

MEASURING INSTRUMENTS

Export General Catalogue

For over 40 years, the Sauermann Group has designed, manufactured and sold products and services dedicated to industrial and HVACR markets. The Group specifically focuses on the detection, measurement and control of indoor air quality (IAQ).

We operate three main brands: Sauermann for condensate removal pumps (including accessories and solution kits) and instruments for improving indoor air quality, as well as Kimo and E Instruments for instruments aimed at measuring and monitoring air parameters.

The Group has a worldwide presence, is located on three continents (Europe, Asia and North America), has 21 sites (including four production plants).

Customer support

On receipt of your instrument, our technicians take care of it in accordance with our quality procedures. A complete check is performed and a quotation is issued.

The instrument is cleaned and repaired.
A complete test is done prior to return shipment.

Calibration and settings

Accredited temperature laboratory as per ISO 17025 standard

KIMO can perform COFRAC calibrations on any type of thermometer: measuring chain, PT100, Thermocouple) within a range from -70 to +200°C, in sterilizer or in baths.

Accredited hygrometry laboratory as per ISO 17025 standard

KIMO can perform COFRAC calibrations on any type of hygrometer within a range from 5 to 95 %RH for a dry temperature from +10 to +50°C.

SOFTWARE

Ligaz-2

- Record your customers, boilers and measurements
- Automatic report filling
- Synchronisation of PC/instrument database

Logaz-2

- Easy reading of measurement reports. Customize, print and export your files
- Display and recording of measurements in real-time
- Synchronisation of PC/instrument database
- Organize your timetable, maintenance contracts, follow-ups

Interchangeable sensors

The sensor electronics contain calibration data, which means that the operator can replace them without returning the unit to the factory.

Kimo equips its KIGAZ (excluding KIGAZ 80 and 50) units with a lead-free O₂ sensor with a lifetime of 5 years.

**Lead-free
O₂ sensor**

Connected instruments

Available as an option, the low consumption Bluetooth® module is compatible with all KIGAZ units (excluding the class 50) and provides significant time gains by wirelessly connecting analysers with LIGAZ-2 or LOGAZ-2 software or the mobile KIGAZ application.

CONNECTED DATA LOGGERS

TrackLog

LoRa® Powered Data Loggers

Temperature / Humidity / Pressure / Air Quality / Atmospheric Pressure

Sauermann has released a new TrackLog line of Data Loggers featuring LoRa® wireless technology that allows customers to monitor multiple parameters over long distances, using an interference resistant connectivity and a high strength signal.

LoRa® is a Low Power Wide Area Network. It offers a mix of long range, low power consumption and secure data transmission that is making our world a Smart Planet.

Product overview

TrackLog Data Loggers

LoRa® is a Low Power Wide Area Network or LPWAN technology developed by the chip manufacturer, Semtech. LoRaWAN™ is a communication protocol specification built on top of the LoRa® technology.

Measure multiple parameters

Temperature, humidity, CO₂, atmospheric pressure, differential pressure

Long-distance connectivity

LoRaWAN™ provides extended range

Long battery life

LoRaWAN™ provides extended battery life

Lower overall cost of ownership
