

# FasMate Series<sup>™</sup> Quick Connectors

Instant Threaded Connections

NOW AVAILABLE WITH Connection Verification™

## **LEAK TIGHT CONNECTIONS**

- Verify secure connections for added safety
- Instant connections from vacuum to 5000 psi
   eliminates tape, sealant and wrenches
- Modular operation methods are interchangeable - Lever, Thumb Valve and Pneumatic
- No damage to threaded parts
- Split collet design locks securely
- Easy to replace main seal
- Prevent wasteful *false failures* & functional test spills

fastestinc.com Made in the USA

### Connection Verification<sup>™</sup> enabled tools verify a successful connection has been made!

Connection Verification<sup>™</sup> allows users to:

- · Verify connections prior to starting a leak test
- Eliminate waste caused by false failures
- Collect data to verify operators have made the correct connection
- Improve reliability and safety throughout the testing process
- Prevent dangerous and costly spills in functional product testing

### **Inconsistent Seal Placement / Incorrect Port Placement**

Poor placement and "short-connects" lead to *false failures* and wasteful re-testing of products. The Connection Verification<sup>™</sup> LED instantly alerts operators that the seal is placed correctly, leading to consistently accurate test results.

A short connect will cause a false failure.

## How much do false failures cost your company?

Notes:

Part Number Keys are to assist in IDENTIFICATION ONLY.

Verify new part numbers with factory; some configurations are not possible.

Connection Verification is only available for FNL and FNP.

Connection Verification is not available for FNV.

FNP is only available with the analog output.

### **FN Series**

Instant Leak Tight Connection to Internal Threads with Squeeze Lever, Push Button, and Pneumatic Actuation Methods

Features	Benefits
Pressure assisted grip and seal	Locks connector securely, even when used in dynamic hydraulic applications
No wrench tightening, thread damage, tape or sealant	Reduces wear on test piece and prevents contamination of media
Intuitive design and precise engineering	Easy to use, no operator adjustment, sealing with no guesswork
Ergonomic product	Reduces operator stress from repetitive motion
Robust, durable construction	Endures demanding production environments
Easy service of parts without special tools	Field serviceable, reduces operational cost and maintenance down time

#### **Technical Specifications**

Housing Material	Stainless steel and anodized aluminum
Seal Material	Buna-N
Connection Profile	Mates with BSPP, BSPT, Metric, SAE and NPT threads
Termination Profile	BSPP or NPT female thread port
Operating Pressure	Vacuum to 5000 psi (Body sizes 1 to 4) Vacuum to 3500 psi (Body size 5) Vacuum to 750 psi (Thin walled pipe models)
Operating Temp.	-40°F to +250°F (-40°C to +121°C)
Maximum Side Load Rating for FN Series	12.5 - 75 in-lbs (1.4 - 8.4 Nm)

#### For FNV/FNP and FXV/FXP only:

65 - 120 psi (4.5 to 8 bar)

The FasMate FN Series instantly seals threaded ports from vacuum up to 5000 psi for most models. The patented proprietary design makes sealing threaded ports as easy as 1, 2, 3.

Squeeze lever to collapse the threaded collets

Insert into threaded port

(3

**Releasing the lever expands** the collets for a safe secure leak free connection

Term

Substitute "V" or "P" for actuation options:

Thumb Valve = FN<u>V</u>-082085

Automated Pneumatic = FNP-082085

#### Note:

Connectors can be quickly adapted to lever, pneumatic or thumb valve actuation for all FN models.

FXL and FXV are also interchangeable. (FXP is excluded).

Instant Leak Tight Connection to Internal Threads with Squeeze Lever, Push Button or Pneumatic Actuation

Connectors can be quickly adapted to lever, pneumatic or thumb valve actuation for all models.

Features	Benefits
Minimized thread and insertion length	Instant connections to small or difficult to seal parts, improves productivity
Pressure assisted grip and seal	Locks connector securely, even when used in dynamic hydraulic applications
No wrench tightening, thread damage, tape or sealant	Reduces wear on test piece and prevents contamination of media
Intuitive design and precise engineering	Easy to use, no operator adjustment, sealing with no guesswork
Ergonomic product	Reduces operator stress from repetitive motion
Robust, durable construction	Endures demanding production environments

#### **Technical Specifications**

Housing Material	Stainless steel and anodized aluminum
Seal Material	Buna-N
Connection Profile	Mates with NPT, SAE O-Ring Boss, Metric and BSPP
Termination Profile	NPT or BSPP female thread port
Operating Pressure	Vacuum to 2500 psi (172 bar)
Operating Temp.	-40°F to +250°F (-40°C to +121°C)
Maximum Side Load Rating for FN Series	9.38 - 28.13 in-lbs. (1.06 - 3.18 Nm)
For FNV/FNP and FXV/FXP only:	
Pilot Pressure	65 - 120 psi (4.5 to 8 bar)

#### **Specifications, Parts and Accessories**

For complete dimensions, seals, repair kits and accessories, visit www.fastestinc.com and enter part number into search field.

The **FasMate FNR Series** instantly seals threaded ports from vacuum up to 2500 psi for most models. The patented proprietary design makes sealing threaded ports as easy as 1, 2, 3.

Squeeze lever to collapse the threaded collets

Insert into threaded port

3 Re th

Releasing the lever expands the collets for a safe secure leak free connection

## **FX Series**

Instant Leak Tight Connection to External Threads with Squeeze Lever, Push Button, and Pneumatic Actuation Methods

Features	Benefits
Pressure assisted grip and seal	Locks connector securely, even when used in dynamic hydraulic applications
No wrench tightening, thread damage, tape or sealant	Reduces wear on test piece and prevents contamination of media
Intuitive design and precise engineering	Easy to use, no operator adjustment, sealing with no guesswork
Ergonomic product	Reduces operator stress from repetitive motion
Robust, durable construction	Endures demanding production environments
Easy service of parts without special tools	Field serviceable, reduces operational cost and maintenance down time

#### **Technical Specifications**

Housing Material	Stainless steel and anodized aluminum
Seal Material	Buna-N
Connection Profile	Mates with BSPP, BSPT, Metric, SAE and NPT threads
Termination Profile	BSPP or NPT female thread port
Operating Pressure	Vacuum to 5000 psi Vacuum to 750 psi (Thin walled pipe models)
Operating Temp.	-40°F to +250°F (-40°C to +121°C)

#### For FNV/FNP and FXV/FXP only:

Pilot Pressure	65 - 120 psi (4.5 to 8 bar)
----------------	-----------------------------

The **FasMate FX Series** instantly seals threaded ports from vacuum up to 5000 psi for most models. The patented proprietary design makes sealing threaded ports as easy as 1, 2, 3.

Squeeze lever to collapse the threaded collets

#### **Specifications, Parts and Accessories**

For complete dimensions, seals, repair kits and accessories visit www.fastestinc.com and enter part number into part number search field.

For ordering information or technical support contact *FasTest* or your local distributor.

FasTest connectors are a critical part of our customers' quality assurance. FasTest's seals and repair parts are specifically engineered for your connector. To ensure and prolong the peak performance of FasTest connectors, proper maintenance with FasTest Genuine Parts, including seals, o-rings and other wear components, is required.

FasTest connectors require main seals and internal components to be replaced periodically throughout the connector's life.

Connector main seals should be visually inspected every 1000 actuations. For regularly used connectors, main seals should be replaced at least every 10,000 actuations or every three months, whichever occurs first. Each FasTest connector should be disassembled and rebuilt with new key wear components once every six months to maintain their optimal performance. This ensures the internal components and lubricants will continue working at peak performance.

Only FasTest Genuine Parts should be used with FasTest connectors. Main seals and replacement parts are made and specified by FasTest for FasTest connectors. FasTest Genuine Parts ensure that our customers' production line and manufacturing processes are performing to the highest standards.

### How to Order Seals and Replacement Parts

- 1. Visit fastestinc.com
- 2. Enter the product number in the "Quick Search" tab or select the "Product Selector" tab
- 3. Click on the desired FasTest product to go to the product page
- 4. View corresponding seals and replacement parts under "FasTest Genuine Parts"
- 5. Either click "Add to cart" or "Add to quote" to purchase the selected product through the FasTest website, or contact your local distributor

NOTE: Connector maintenance, operating and rebuild instructions are available under the "Instructions" tab on individual product pages.

#### Patents

FasTest Inc. takes pride in its innovative quick disconnect coupling solutions, many of which have been awarded United States and International patents. FasTest Inc. has a strong tradition of leadership in the quick disconnect market, and aggressively pursues and protects its proprietary information and intellectual property.

All products are designed and manufactured by FasTest Inc. USA

#### **Limited Express Warranty**

FasTest Inc. warrants its products against defects in workmanship and materials for 12 months from the date of sale by FasTest Inc. or its authorized distributor. This warranty is void if the product is misused, tampered with or used in a manner that is contrary to FasTest Inc.'s written recommendations and/or instructions.

See website for complete warranty information.

#### **Custom Applications**

FasTest has full engineering and manufacturing capability to provide special accommodations to meet specific applications. Our engineers are available to review your unique application requirements.

FasTest Inc. is ISO 9001: 2015 certified.

Proudly Manufactured in the U.S.A.
