GIMA Three Phase Digital Panel Meters

Accessories - Three-Phase Current Transformer

A three-phase terminal style current transformer must be used with GIMA® three phase meters.

The current transformer is equipped with terminals to permit easy connection to the GIMA units.

These terminals are #8-32 brass studs and come with a flatwasher, lockwasher and a regular nut (leads are not provided).

Mounting Requirements

Panels should be .04 to .16 inches (1mm to 4mm) thick with a square cut-out of 3.62" x 3.62" (92mm x 92mm.)

A minimum depth of 2.83" (72mm) should be allowed behind the panel for the meter.

Remove the panel mounting clips and insert the meter into the cutout from the front of the panel.

Push the meter home.

Ensure the screws in each panel mount clip are fully retracted and insert the clips as shown in the diagram below.

Tighten the screws to secure the meter firmly in the panel. Do not overtighten.
